# How to use?

This asset converts all the ".pcd" files into a prefab asset of point clouds at the location of the ".pcd" file with the same name.

To Import a *New* Asset –
- Drag and drop any ".pcd" file into the project
- Right click on the project window and select *Import New Asset* from the menu.

**To Convert Existing Assets** –

- **Go to Assets and then click on** *Reimport All.*
